  - I am redirected to the dashboard when trying to open a page.

  - The lot list is empty after applying filters.

  - A lot's status seems out of date.

  - The monitoring page shows an Alert zone but no alert appears in the Alerts page.

  - Who can export traceability data?

- Tips for All Users

# Introduction

## What is FutureKawa?

FutureKawa is a web application for managing and tracing coffee lots across the entire supply chain, from the farm to final shipment. It provides real-time visibility on stock levels, IoT sensor readings (temperature and humidity), quality control decisions and logistics operations.

*FutureKawa runs in your web browser. No installation is required.*

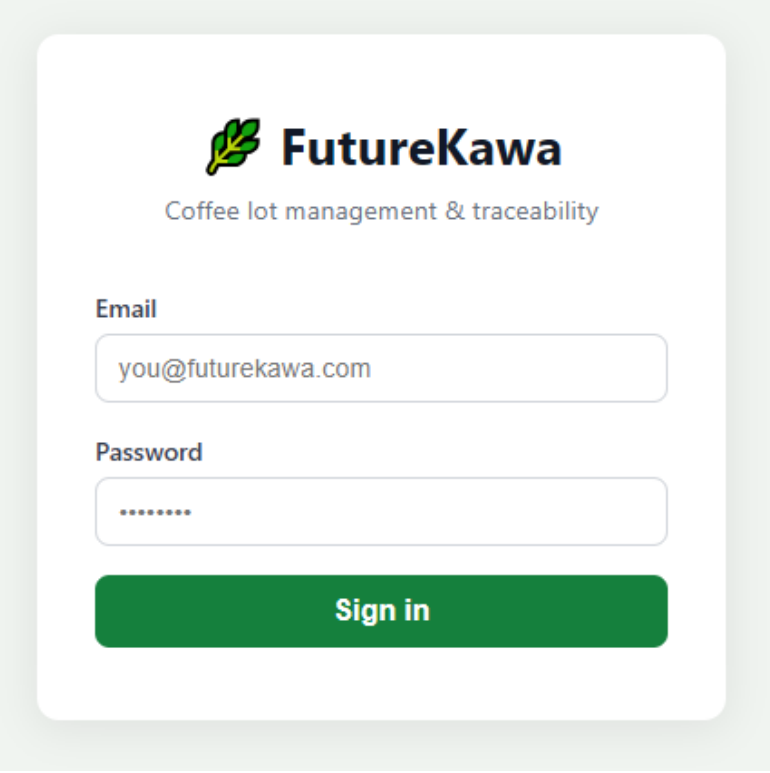

## User Profiles

The application is tailored for five distinct roles, each with its own home page and set of features:

| Role              | Profile                  | Main Responsibilities                            |
|-------------------|--------------------------|--------------------------------------------------|
| Farm Manager      | On-site at a coffee farm | Create lots, record shipments from the farm      |
| Warehouse Manager | At the storage warehouse | Stock management, zone transfers, IoT monitoring |
| Quality Team      | Quality control team     | Status validation, traceability report export    |
| Supply Chain      | Logistics & planning     | Cross-country KPIs, FIFO risk monitoring         |
| Headquarters (HQ) | Senior management        | Global reporting, compliance, country overview   |

## Signing In

Open your browser and go to the FutureKawa URL provided by your administrator.

The image shows a login interface for FutureKawa. At the top, there is a logo consisting of a green leaf icon and the text "FutureKawa". Below the logo is the tagline "Coffee lot management & traceability". The login form has two input fields: "Email" with the placeholder text "you@futurekawa.com" and "Password" with a masked password ".....". Below these fields is a green button labeled "Sign in".

 **FutureKawa**  
Coffee lot management & traceability

Email

Password

**Sign in**

On the login screen, enter:

- Your email address (e.g. you@futurekawa.com)
- Your password

After signing in, you are redirected automatically to your role's home page. Your name and role are displayed in the top-right corner of the navigation bar.

*Your data is automatically scoped to your country, farm, or warehouse. You will only ever see lots and alerts relevant to your area.*

## Navigation Bar

The dark green bar at the top of every page provides:

- FutureKawa logo - click to return to your home page
- Navigation links - pages available to your role
- Your name and role - shown on the right
- Log out button - always accessible on the right

## Common Features

The following pages are accessible to all roles.

### Lots List (/lots)

A paginated list of all coffee lots in your scope, filterable by multiple criteria.

**Coffee lots**

| Lot No.  | Country  | Farm        | Warehouse   | Zone | Production date | Storage date 1 (FIFO) | Status  | Latest reading |                         |

| F68630F4 | Colombia | Pepper Farm | B Warehouse | M    | 6/15/2026       | 9/19/2025             | ALERT   | ● 31.9°C 54%   | <a href="#">Details</a> |
| 5AFFFD5A | Colombia | Pepper Farm | A Warehouse | S    | 12/8/2025       | 9/27/2025             | ALERT   | ● 31.8°C 58%   | <a href="#">Details</a> |

### Cascade Filters

The filter bar at the top lets you narrow down the list by:

- Country - producing country
- Farm - specific farm within the selected country
- Warehouse - storage facility
- Zone - specific zone within the warehouse
- Status - see the status reference table below

All filters apply instantly. Changing a filter resets the list to page 1. Pagination controls appear at the bottom (20 lots per page).

### Lot Status Reference

| Status    | Meaning                                     |
|-----------|---------------------------------------------|
| Pending   | Lot just created, awaiting storage          |
| Stored    | Received and placed in a warehouse zone     |
| Compliant | Inspected and validated by the Quality Team |

|                |                                              |
|----------------|----------------------------------------------|
| <b>Alert</b>   | Flagged due to IoT readings or another issue |
| <b>Blocked</b> | Cannot be shipped until issue is resolved    |
| <b>Shipped</b> | Has left the warehouse                       |

## Lot Detail (/lots/:id)

Click on any lot in the list to open its detail page. The page contains:

- Information panel - Farm, Country, Warehouse, Zone, Production date, Storage date, and current status
- Latest IoT reading - most recent temperature and humidity, with a threshold status indicator
- Temperature & humidity history chart - full time-series view; hover over data points for exact values

## Farm Manager

### □ Farm Manager

Lot creation and farm-level shipment management

### Overview

Farm Managers register new coffee lots and record their departure from the farm. The view is automatically scoped to the farm and country associated with your account.

### Available Pages

| Page / URL       | Description                                 |
|------------------|---------------------------------------------|
| /farm            | Home - farm lot list and shipment recording |
| /farm/create-lot | Form to create a new coffee lot             |

### My Farm (/farm)

Your home page after login. It displays:

- Your name
- The Record a Shipment quick action panel
- The complete list of lots for your farm, sorted by storage date (oldest first - FIFO order)

## Creating a New Lot

When a new coffee batch is ready to enter the system, navigate to the lot creation form.

1. **Click + New lot** - top right of the My Farm page

2. **Select the farm** - your farm is pre-selected automatically
3. **Select the initial status** - typically Pending for a freshly harvested lot
4. **Enter the quantity** - in kilograms
5. **Enter a characteristic value** - optional quality indicator
6. **Click Create lot** - you are redirected to My Farm on success

*The system automatically assigns a unique batch number (e.g. FK-2026-0042) on creation.*

[← Back to farm](#)

## Create a lot

Cancel Create lot

## Recording a Shipment

When a lot physically leaves the farm, record the movement from the My Farm page.

Record a shipment

- Select a lot - ▼

Customer shipment ▼

Ship

1. **In the Record a shipment panel** - select the lot from the dropdown (non-shipped lots only)
2. **Select the shipment type** - Customer shipment, Transfer, or Loss / disposal
3. **Click Ship** - the lot status updates and the list refreshes

*Already-shipped lots do not appear in the shipment dropdown.*

## Warehouse Manager

### □ Warehouse Manager

Stock management, zone transfers, status updates, and IoT monitoring

### Overview

Warehouse Managers control all lot movements within their warehouse. They can ship lots out, transfer them between storage zones, update statuses, and monitor environmental conditions in real time.

### Available Pages

| Page / URL           | Description                         |

### Stock Out - Ship a Lot

**Stock out**

- Select lot -

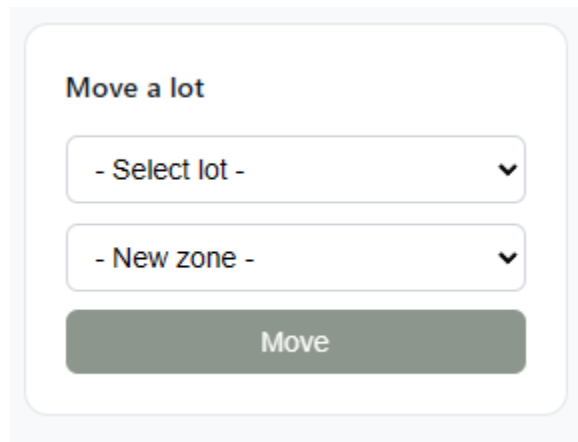

Reason

Ship lot

Use when a lot must leave the warehouse for a customer or transfer.

1. **Select the lot** - from the Stock out dropdown
2. **Enter an optional reason** - e.g. Customer order #12345
3. **Click Ship lot** - the lot is marked Shipped and removed from the active list

## Move a Lot - Zone Transfer

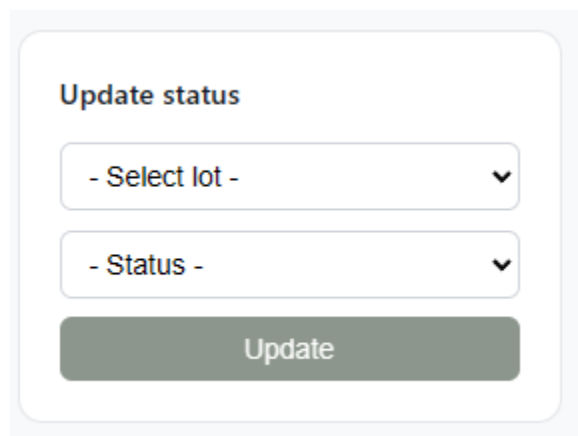

The 'Move a lot' form is a light gray rounded rectangle. It contains the title 'Move a lot' in bold. Below the title are two dropdown menus: the first is labeled '- Select lot -' and the second is labeled '- New zone -'. Both dropdowns have a downward arrow icon on the right. Below the dropdowns is a dark gray button with the text 'Move' in white.

Reassign a lot to a different storage zone within your warehouse.

1. **Select the lot** - from the Move a lot dropdown
2. **Select the destination zone** - all zones in your warehouse are listed
3. **Click Move** - the lot's zone updates immediately

## Update Status

The 'Update status' form is a light gray rounded rectangle. It contains the title 'Update status' in bold. Below the title are two dropdown menus: the first is labeled '- Select lot -' and the second is labeled '- Status -'. Both dropdowns have a downward arrow icon on the right. Below the dropdowns is a dark gray button with the text 'Update' in white.

Manually change a lot's status after an inspection or event.

1. **Select the lot** - from the Update status dropdown
2. **Choose the new status** - Compliant, Alert, Blocked, or Shipped
3. **Click Update** - the status is saved; the table reflects the change

*Status changes are logged and visible in the movement history.*

### Lots in Stock (FIFO List)

The table below the action panels lists all active lots sorted oldest first (FIFO). Use it to decide which lot to ship next.

| Lots in stock (FIFO - oldest first) |          |             |             |      |                 |                       |         |                |                         |
|-------------------------------------|----------|-------------|-------------|------|-----------------|-----------------------|---------|----------------|-------------------------|
| Lot No.                             | Country  | Farm        | Warehouse   | Zone | Production date | Storage date † (FIFO) | Status  | Latest reading |                         |

### Movement History (/warehouse/movements)

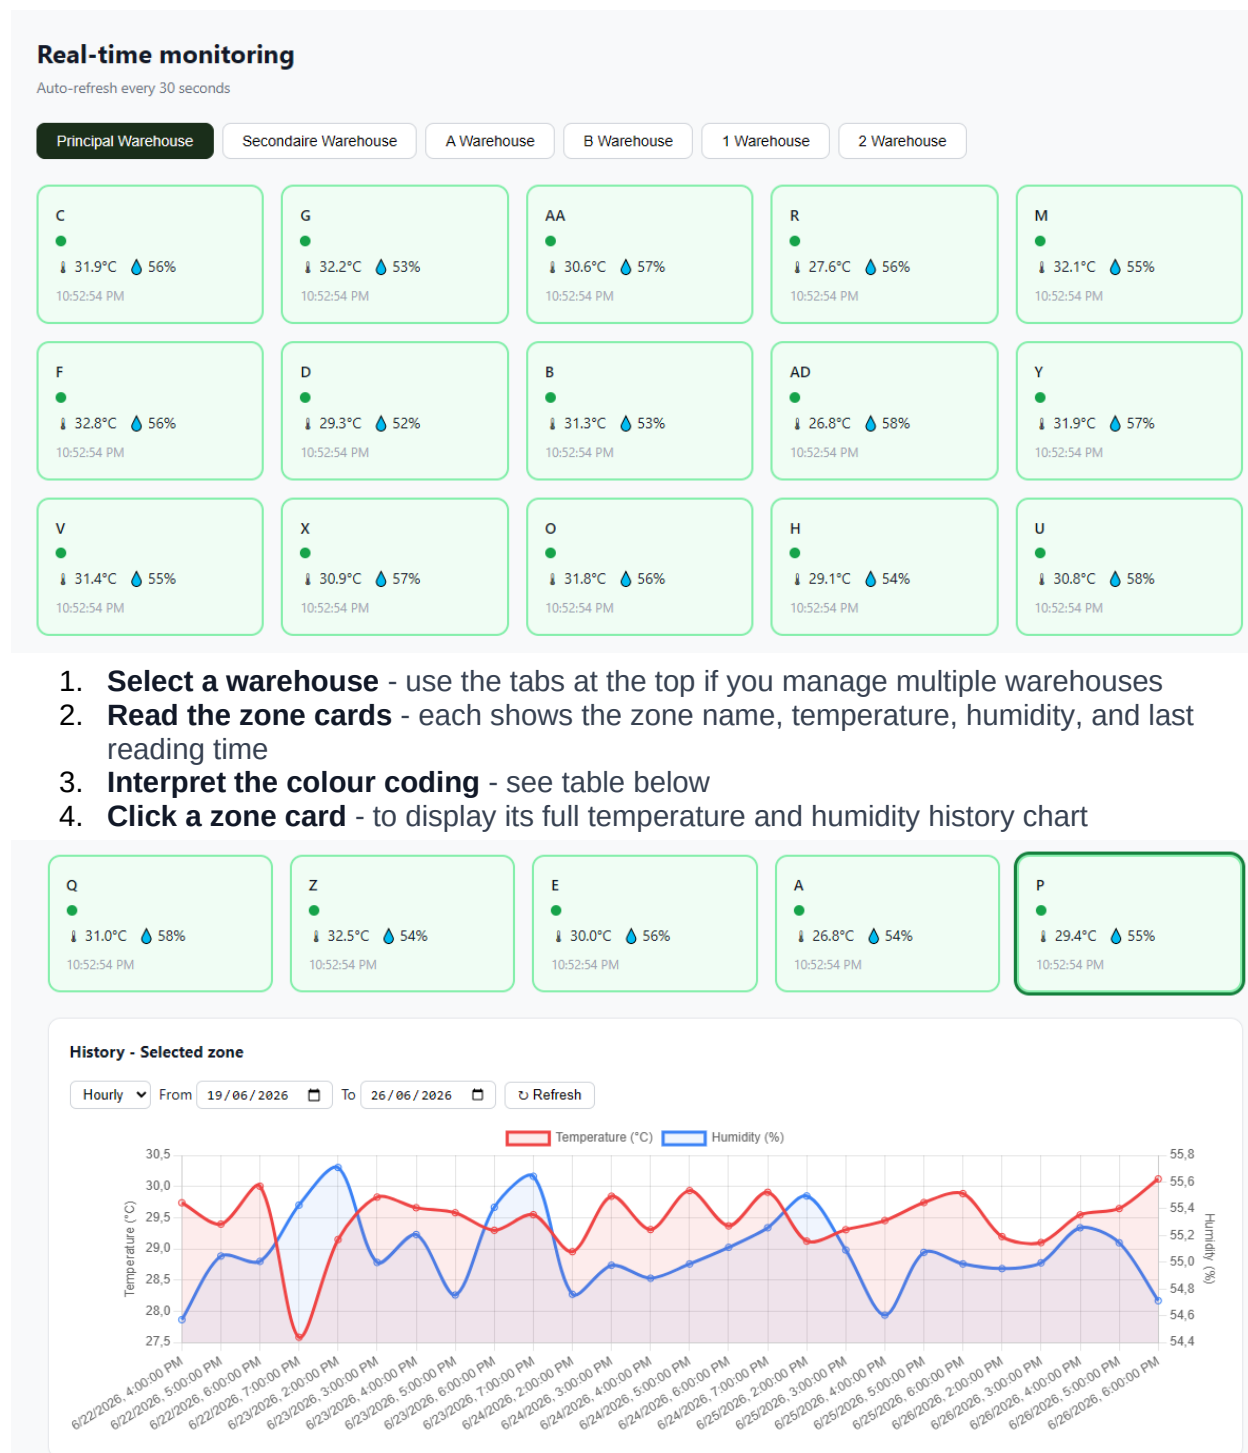

A paginated log of every movement recorded in your warehouse: stock-ins, stock-outs, and zone transfers.

Each row shows the date, movement type, lot batch number, from/to zone, reason, and the operator who performed it. Use the pagination controls at the bottom to browse history (20 per page).

| Badge Colour    | Movement Type                             |
|-----------------|-------------------------------------------|
| Green - In      | Stock-in: lot received in the warehouse   |
| Red - Out       | Stock-out: lot shipped from the warehouse |
| Blue - Transfer | Zone transfer: lot moved between zones    |

## Real-Time Monitoring (/monitoring)

Live environmental data for each zone in your warehouse, auto-refreshed every 30 seconds.

| Card Colour   | Meaning                                                     |
|---------------|-------------------------------------------------------------|
| Green border  | All readings within acceptable thresholds                   |
| Yellow border | One value approaching the threshold limit - monitor closely |
| Red border    | One or both values exceed the threshold - action required   |

## Alerts (/alerts)

All notifications relevant to your scope, filterable by type and read status.

### Alerts

☒ Active only    - All types -

**OUT OF RANGE** Zone : AA

Temperature trop haute: 32.46 (ideal=26, tolerance=2)

6/18/2026, 2:20:45 PM

Mark as read

**OUT OF RANGE** Zone : S

Temperature trop haute: 30.33 (ideal=26, tolerance=2)

6/18/2026, 2:20:45 PM

Mark as read

**OUT OF RANGE** Zone : X

Temperature trop haute: 28.82 (ideal=26, tolerance=2)

6/18/2026, 2:20:45 PM

Mark as read

### Alert Types

| Type         | Triggered When                                                     |
|--------------|--------------------------------------------------------------------|
| Out of range | Temperature or humidity exceeds the threshold defined for the zone |
| Expiry       | A lot has been stored for more than 365 days                       |
| FIFO         | A lot risks being shipped out of First-In-First-Out order          |

### Filters

- Active only - shows only currently active alerts (enabled by default)
- Type - filter to a specific alert type

## Marking Alerts as Read

Each unread alert has a Mark as read button. Click it to acknowledge the alert. Read alerts become visually dimmed. The unread count on the dashboard updates immediately.

## Quality Team

### □ Quality Team

Status validation, traceability reports, and IoT monitoring

### Overview

Quality Team members validate lot compliance, update statuses after inspection, and generate traceability reports for audits or customer requests. They also have access to real-time monitoring.

### Available Pages

| Page / URL | Description                                  |
|------------|----------------------------------------------|
| /quality   | Home - status update and traceability export |
| /lots      | Full lot list with filters                   |

### Quality Dashboard (/quality)

Your home page. It contains two action panels and two lot tables.

Includes all IoT readings and lot statuses

Non-compliant / alert lots

| Lot No.  | Country  | Farm          | Warehouse           | Production date | Storage date † (FIFO) | Status  |                         |
|----------|----------|---------------|---------------------|-----------------|-----------------------|---------|-------------------------|
| 81BACB47 | Brazil   | Flamenco Farm | Principal Warehouse | 4/5/2026        | 8/20/2025             | BLOCKED | <a href="#">Details</a> |
| 51546267 | Colombia | Pepper Farm   | A Warehouse         | 4/17/2026       | 8/20/2025             | BLOCKED | <a href="#">Details</a> |
| 18DAB799 | Brazil   | Flamenco Farm | Principal Warehouse | 5/30/2026       | 8/22/2025             | ALERT   | <a href="#">Details</a> |
| 58117DF4 | Ecuador  | Ocho Farm     | 1 Warehouse         | 2/12/2026       | 8/22/2025             | ALERT   | <a href="#">Details</a> |

## Update Lot Status

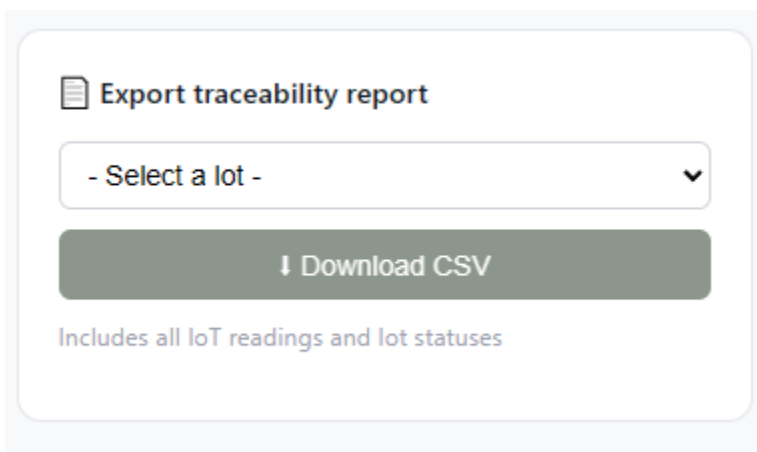

The form is titled "Update lot status". It contains two dropdown menus. The first dropdown is labeled "- Select a lot -" and the second is labeled "- Status -". Below the dropdowns is a green button labeled "Confirm".

After a physical or analytical inspection, update the lot status to reflect the result.

1. **Select the lot** - the current status is shown in parentheses
2. **Choose the new status** - Compliant, Alert, Blocked, or Shipped
3. **Click Confirm** - the status updates immediately across all views

*Only the Quality Team can set a lot to Compliant, formally validating it for shipment.*

## Export Traceability Report

The form is titled "Export traceability report" with a document icon. It contains a dropdown menu labeled "- Select a lot -". Below the dropdown is a green button labeled "Download CSV". At the bottom of the form, it says "Includes all IoT readings and lot statuses".

Generate a CSV file with the full IoT reading history for a selected lot. Used for audits, customer quality certificates, or regulatory submissions.

1. **Select a lot** - from the export dropdown
2. **Click Download CSV** - the file downloads to your computer immediately

The exported CSV contains:

- Lot header: batch number, farm, country, current status
- One row per IoT reading: date, temperature, humidity, threshold status

## Non-Compliant / Alert Lots Table

Shows only lots with status Alert or Blocked. Use this to prioritise which lots need immediate attention.

| Non-compliant / alert lots |          |               |                     |                 |                       |         |                         |
|----------------------------|----------|---------------|---------------------|-----------------|-----------------------|---------|-------------------------|
| Lot No.                    | Country  | Farm          | Warehouse           | Production date | Storage date † (FIFO) | Status  |                         |
| B1BACB47                   | Brazil   | Flamenco Farm | Principal Warehouse | 4/5/2026        | 8/20/2025             | BLOCKED | <a href="#">Details</a> |
| 51546267                   | Colombia | Pepper Farm   | A Warehouse         | 4/17/2026       | 8/20/2025             | BLOCKED | <a href="#">Details</a> |
| 18DAB799                   | Brazil   | Flamenco Farm | Principal Warehouse | 5/30/2026       | 8/22/2025             | ALERT   | <a href="#">Details</a> |

### Global KPIs

| KPI             | Description                                                           |
|-----------------|-----------------------------------------------------------------------|
| Total lots      | Total number of lots in the system across all countries               |
| Compliance rate | Percentage of Compliant lots - green if $\geq 90\%$ , orange if below |
| Active alerts   | Currently active alerts - highlighted red if count exceeds 10         |
| Avg. lot age    | Average number of days lots have been in storage                      |
| Movements (30d) | Number of stock movements recorded in the last 30 days                |

### Country Breakdown Table

A country-by-country summary for the selected period:

- Lots - total lots in that country
- Compliance - compliance rate (green  $\geq 90\%$ , orange below)
- Alerts - active alert count (highlighted red if more than 5)

Use this table to identify which countries need immediate attention.

| Country breakdown |      |            |        |
|-------------------|------|------------|--------|
| Country           | Lots | Compliance | Alerts |
| Brazil            | 120  | 0.0%       | 1079   |
| Colombia          | 120  | 0.0%       | 75180  |
| Ecuador           | 120  | 0.0%       | 13392  |

HQ users can also export traceability reports from the Quality view (/quality), the same as the Quality Team.

## FAQ & Tips

### Frequently Asked Questions

#### **I am redirected to the dashboard when trying to open a page.**

This means the page is restricted to another role. Your account does not have access to it. Contact your administrator if you believe this is an error.

#### **The lot list is empty after applying filters.**

Your filters may be too restrictive. Clear the status filter and remove any cascade filter selections. If the problem persists, contact your administrator.

#### **A lot's status seems out of date.**

Statuses can be updated by the Quality Team and Warehouse Managers independently. Refresh the page to get the latest value.

#### **The monitoring page shows an Alert zone but no alert appears in the Alerts page.**

There may be a short delay between an IoT reading exceeding a threshold and the alert being created. Wait a moment and refresh the Alerts page.

#### **Who can export traceability data?**

Only Quality Team and HQ users. Go to /quality, select a lot in the Export traceability report panel, and click Download CSV.

### Tips for All Users

- FIFO sorting (oldest lot first) is the default in all warehouse and supply chain views. Always prioritise the top-listed lot for shipment.
- The unread alert badge updates automatically - no need to refresh the page.
- On the lot detail page, hover over the history chart to see exact temperature and humidity values at any point in time.
- Always log out when leaving your workstation: click Log out in the top-right corner of the navigation bar.
